

UI/UX Design Brief

DICE by Sanyog — Mobile Application

Version: 1.0.0

Date: June 2025

1. Design Philosophy

DICE follows a "**Confident & Calm**" design principle: - **Confident** — Bold typography, clear hierarchy, decisive color choices - **Calm** — Generous whitespace, smooth animations, no visual clutter - **Trustworthy** — Professional appearance fitting for a compliance/legal product - **Intelligent** — AI-first UX with smart defaults and contextual suggestions

2. Color System

2.1 Dark Theme (Primary)

TOKEN	HEX	USAGE
bgDark	#0A0B0F	App background
bgCard	#12131A	Card backgrounds
bgCardLight	#1C1E2A	Elevated cards
primary	#6C63FF	CTAs, active states, primary actions
primaryDark	#5A52E0	Pressed primary, gradients
secondary	#00D4FF	Highlights, secondary actions
secondaryDark	#00B8E0	Pressed secondary
success	#10B981	Approved, active, passed
successDark	#059669	Success pressed
warning	#F59E0B	Expiring, pending, caution
warningDark	#D97706	Warning pressed
error	#EF4444	Failed, rejected, alerts
textPrimary	#F1F5F9	Primary text
textSecondary	#94A3B8	Secondary text, subtitles
textTertiary	#64748B	Placeholder, labels
border	rgba(255, 255, 255, 0.08)	Card borders, dividers

2.2 Light Theme

TOKEN	HEX	USAGE
bgDark	#F0F4FF	App background
bgCard	FFFFFF	Card backgrounds
bgCardLight	#F7F8FC	Elevated cards
primary	#6C63FF	Same — consistent brand color
textPrimary	#0F172A	Dark text on light background
textSecondary	#64748B	Secondary text
textTertiary	#94A3B8	Tertiary text
border	#E2E8F0	Card borders

2.3 Gradient Combinations

USAGE	COLORS
Hero banners, primary cards	#1A1560 → #6C63FF → #00D4FF
CTA buttons primary	#6C63FF → #5A52E0
Success highlights	#10B981 → #059669
Warning highlights	#F59E0B → #D97706
Feature cards (varied)	#7C3AED → #A855F7 , #0EA5E9 → #38BDF8

3. Typography

3.1 Type Scale

NAME	SIZE	WEIGHT	USAGE
display	32px	800	Hero numbers, stats
h1	28px	800	Screen titles (full page)
h2	24px	800	Section titles (tab screens)
h3	20px	700	Card titles, detail headers
h4	18px	700	Sub-section titles
body	15px	400–500	Body text, descriptions
small	13px	400–500	Labels, secondary info
caption	11px	400–600	Timestamps, metadata, badges
micro	9px	500–600	Minimum label size (tab icons)

3.2 Font Family

- System font: **SF Pro** (iOS), **Roboto** (Android)
- No custom font loading to minimize bundle size

4. Spacing System

```
xs  = 4px
sm  = 8px
md  = 12px
base= 16px ← standard padding
lg  = 20px ← horizontal screen padding
xl  = 24px
2xl = 32px
3xl = 40px
4xl = 48px
5xl = 64px
```

5. Border Radius

```
sm  = 6px  - small chips, micro elements
md  = 10px - buttons, small cards
base = 12px - standard buttons, back buttons
lg  = 16px - main cards, modals
xl  = 20px - hero sections, feature cards
2xl = 24px - large modals, sheets
3xl = 32px - splash logo card
full = 9999px - pills, badges, tags
```

6. Component Library

6.1 Buttons

VARIANT	BACKGROUND	USE CASE
<code>primary</code>	<code>colors.primary</code> gradient	Main CTA
<code>outline</code>	Transparent + border	Secondary action
<code>ghost</code>	Transparent	Tertiary action
<code>danger</code>	<code>colors.error</code>	Destructive action

Props: `title` , `variant` , `fullWidth` , `icon` , `loading` , `disabled` , `size`

6.2 Badge

Variants: `success` , `warning` , `error` , `info` , `primary` , `outline`

Sizes: `sm` , `md` , `lg`

Props: `label` , `variant` , `size` , `dot`

Status → variant mapping: - `approved` / `active` / `completed` → `success` - `pending` / `under_review`
→ `warning` - `rejected` / `failed` / `expired` → `error` - `draft` / `new` → `info`

6.3 Cards

- All cards use `LinearGradient` for background (dark → slightly lighter)
- `borderRadius: lg (16px)`
- `borderWidth: 1`

- `borderColor: rgba(255,255,255,0.06)` (dark) / `colors.border` (light)
- Shadow: `Shadows.sm` applied to the container View

6.4 Avatar

- Shows initials if no URI
- `online` prop adds green dot indicator
- Sizes: `sm (32)` , `md (40)` , `lg (52)` , `xl (72)`

6.5 ProgressBar

- Height: configurable (default 6px)
- Color: `colors.primary`
- Animated fill
- Used in application cards and detail screens

6.6 Timeline

- Vertical connector line
- States: `completed` (filled dot + primary color), `current` (pulsing), `upcoming` (outlined)
- Date shown for completed/current

6.7 NotificationBell

- Bell icon with badge counter
- Badge: red circle, `9+` for > 9 unread
- Sourced from `useNotificationStore`

6.8 AIWidget

- Gradient background with sparkle icon
 - Used for AI-powered features callout
-

7. Screen Layout Patterns

7.1 Standard Screen

```
SafeAreaView
├─ LinearGradient (absoluteFill background)
├─ Header (paddingHorizontal: 20, paddingVertical: 12)
│   └─ Back / Menu button (40×40, borderRadius: 12)
│       └─ Title + Subtitle (flex: 1)
│           └─ Action button (40×40)
├─ Filter chips (horizontal ScrollView, height: 56)
└─ ScrollView (contentPadding: 20, paddingTop: 16)
    └─ Cards, lists, etc.
```

7.2 Detail Screen

```
SafeAreaView
├─ LinearGradient background
├─ Header (back + title + badge)
├─ Hero section (gradient card with key metrics)
├─ ProgressBar (horizontal, margin: 20)
├─ Tab bar (horizontal scroll)
└─ ScrollView
    └─ Tab content (cards)
```

7.3 Tab Screens (Main Nav)

```
SafeAreaView
├─ Header
│   └─ [≡ menu] aligned to title top
│       └─ Title (24px, 800) + Subtitle (13px, secondary)
│           └─ Action icons (right)
├─ Search bar
├─ Filter chips
└─ Content list
```

8. Animation Principles

ANIMATION	TYPE	DURATION
Screen transition	Native stack (slide)	250ms
Card expand/collapse	<code>LayoutAnimation.easeInEaseOut</code>	300ms
Splash logo in	Spring (tension: 50, friction: 7)	~400ms
Splash tagline in	Timing + translateY	380ms
Button press	<code>activeOpacity: 0.7</code>	Instant
Tab switch	Immediate	0ms
Pull to refresh	Native spinner	—

9. Dark / Light Mode Guidelines

- All colors sourced from `useTheme()` — never hardcoded except pure white `#FFFFFF` on gradient overlays
- Card backgrounds: `LinearGradient` with theme-aware colors
- Borders: `rgba(255,255,255,0.06)` in dark / `colors.border` in light
- Text always from `colors.textPrimary` / `textSecondary` / `textTertiary`
- Status bar: `light-content` in dark / `dark-content` in light (via `ThemedStatusBar`)

10. Navigation UI

Bottom Tab Bar

- 5 tabs: Home, Certifications, Applications, Insights, Profile
- Active tab: `colors.primary` icon + label
- Inactive: `colors.textTertiary`
- Badge: red circle (Applications, Insights) showing unread count
- Tab bar background: blurred/frosted glass effect in iOS 26

Drawer

- Opens from left (swipe or avatar tap on Home / hamburger on other screens)
 - Contains: Profile summary, main navigation, settings links, logout
-

11. Empty States

Each empty state should have: 1. Centered illustration or icon (48–64px, `colors.textTertiary`) 2. Title: 16px, 600 weight 3. Subtitle: 13px, secondary color 4. Optional CTA button

Examples: - No applications: "No applications yet" + "Start your first application" button - No certifications: "Add your first certificate" - No insights: "Nothing new today — check back later"

12. Accessibility

- Minimum touch target: **44×44pt**
- All interactive elements: `accessibilityRole` + `accessibilityLabel`
- Color contrast: minimum 4.5:1 for text
- Font scaling: supports Dynamic Type (iOS) / Font Scale (Android)
- No color-only status indicators — always paired with text or icon
